

Sizing Guide Bracelet

This guide aims to assist you in determining your bracelet size by measuring your wrist accurately. To obtain precise results, kindly follow these steps:

- 1. Print the document without scaling the pages to ensure accuracy.
- 2. Cut out the provided sizer and wrap it around your wrist, making sure it's comfortable, and measure the thickest part, typically the wrist joint.
- 3. Identify the number on the sizer that corresponds closest to your wrist size.
- 4. For a loose fit, it is suggested to add one centimeter to the measured wrist size.

To ensure accurate measurements, make sure your printer is set to a 100% print size before printing the guide.
